Light Duty Cutting Oils

#1200 Cutting Oils are a series of light duty neat oils for machining a variety of metals. Each oil in this series is available in several viscosities.

#1250 (active sulfur) should only be used when machining steel, whereas the other two oils are multi-metal safe.

When maximum clarity is required, the bright gold color of the **#1230** makes this the product of choice.

If avoiding chlorine is a primary concern, the **#1250** (Steel Only) or **#1270** (All Metals) should be used.

Most Popular -> #1230-15 Cutting Oil
